

Field Level Hazard Assessment

Complete before work starts. Redo it when the work or the conditions change.

One card per crew, per task, per day. If the task changes, the weather turns, or a new crew arrives, start a new card.

Check this yourself. This card is the field level assessment. It is not a substitute for the formal hazard assessment of the task, and an auditor will expect to see both, with this card referencing the formal one.

Job and crew

Date	Time started
Site or location	
Task being performed today	
Supervisor on site	Formal hazard assessment reference
Weather and ground conditions	

Conditions check

☐	Everyone in the crew is fit for duty and has said so.
☐	Everyone has the training and tickets for the task they are doing today.
☐	Required permits are in hand and current.
☐	Emergency plan, muster point and nearest medical facility are known to the crew.
☐	Communication has been checked, and there is a plan for the areas with no signal.
☐	Other crews or trades working nearby have been identified and spoken to.
☐	Overhead and buried services have been identified and located.
☐	Equipment has had its pre use inspection completed today.

| ☐ Gloves, type specified | ☐ Fall protection harness | ☐ Respirator, type specified |
| ☐ Flame resistant clothing | ☐ Fire extinguisher on site | ☐ Gas monitor |

Changes during the shift

Time	What changed	New hazard	What we did about it

Stop work

Every worker on this crew has the authority to stop the work if a hazard is not controlled, and nobody will be disciplined for using it. If work is stopped, record it above and tell the supervisor immediately.

Crew sign on

By signing, I confirm I took part in this assessment, I understand the hazards and controls listed, and I know I can stop the work.
